-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

The abstract of the disclosure is objected to because it contains legal phraseology (i.e., "said"). **Correction is required.** See MPEP § 608.01(b).

Claim Rejections - 35 USC § 103

Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Huynh et al. (U.S. Patent 5,529,432) in view of Goyet (U.S. Patent 4,677,555).

Huynh et al. discloses an automatic ground marking apparatus including a carriage (Figure 1, for example) and a processor (Figure 9, for example). Huynh et al. does not teach the position determining system including the laser, base station and reflector. Goyet teaches the position determining system including the laser, base station and reflector for an apparatus utilizing a carriage. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have used the position determining system of Goyet with the apparatus of Huynh et al. in order to obtain effective automatic performance, as taught by Goyet.

Regarding claims 7 and 8, it is well known to use a compass in applications that require specific spatial relationships. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have used a compass with Huynh et al. in order to properly orient the apparatus, for example.

Regarding claim 14, it is known to use a gimball structure with a ground marking apparatus. It would have been obvious to one of ordinary skill in the art at the time the invention

Art Unit: 3671

was made to have used a gimball structure with the apparatus of Huynh et al. in order to obtain precise measurements of the marking apparatus, in accordance with the purpose of Huynh et al.

Response to Arguments

Applicant's arguments filed January 18, 2005 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
